PROFESSIONAL SUMMARY

software engineer with 3 years of experience, AI Engineer Learner specializing in Generative AI and Data Science. A versatile professional who can be described as a Full-Stack Developer or a Multidisciplinary Software Engineer.

EDUCATION

JUNE 2022 High School Diploma

JUNE 2026 Licence Diploma

Software Engineering & Information System at University of Science Gabes

EXPERIENCE

I started my journey in software development with a focus on web development, working with technologies such as Laravel and React. Over time, I expanded my expertise into the field of Artificial Intelligence engineering, where I gained experience in LLMs, RAG systems, NLP, and Generative AI. I have also worked with machine learning and deep learning frameworks including TensorFlow and scikit-learn, as well as backend frameworks such as Django, Flask, and FastAPI. Additionally, I have explored LangChain for building advanced AI-powered applications. This combination of skills allows me to build both robust web solutions and intelligent AI systems.

CERTIFICATION

- Machine Learning (ML)
- General IA Basics and NLP
- AI & Application
- English

SKILLS

- Python JS SQL PHP C C# C++
- Flask FastAPI Django React Laravel
- Scikit-Learn TensorFlow PyTorch
