PROFESSIONAL SUMMARY

Software Engineer and Information Systems graduate with a strong foundation in full-stack web development and a growing specialization in Artificial Intelligence, Machine Learning, and Data Science. Experienced in building web applications, backend services, REST APIs, and data-driven solutions using modern development frameworks and tools. Strong analytical and problem-solving abilities, with an interest in developing scalable, intelligent, and maintainable software solutions.

TECHNICAL SKILLS

- **Programming:** Python, JavaScript, C, C++, C#, PHP, SQL
- **Web Development:** Flask, Django, FastAPI, REST APIs, HTML, CSS
- **AI & Machine Learning:** Scikit-learn, TensorFlow, PyTorch, Machine Learning, Deep Learning, Generative AI
- **Data & Databases:** PostgreSQL, SQL, Data Analysis, Data Processing
- **Tools & Platforms:** Git, GitHub, Linux, Docker
- **Software Engineering:** Object-Oriented Programming, API Development, Software Design, Problem Solving
- **Soft Skills:** Analytical Thinking, Communication, Teamwork, Organization, Adaptability, Continuous Learning

EXPERIENCE

Software Engineer Intern — Kifahi

Jan 2026 – May 2026

BI Bot | Data Analysis

- Contributed to the development of a Business Intelligence chatbot for ERP data analysis and decision support.
- Worked on backend services, data processing, analytics, and AI-powered features.
- Applied software engineering and machine learning concepts to real-world business data.

Script Writer — Hack Club

May 2025 – Dec 2025

- Developed and maintained Python scripts for technical and community-oriented projects.
- Used Git and GitHub for version control and collaborative development.

PROJECTS

7JUNEAI — Full-Stack AI Chatbot

Developed a full-stack chatbot web application using Flask and React. Implemented RESTful APIs, integrated language-model capabilities, and managed the application environment and backend services.

Web Scraping & Clustering — Data Science

Built a data pipeline using Scrapy for automated data collection and Scikit-learn for preprocessing, clustering, analysis, and visualization.

Machine Learning Classification

Implemented supervised machine learning workflows including data preprocessing, feature engineering, model training, evaluation, and performance comparison.

Deep Learning

Developed and experimented with machine learning and deep learning models, including model training, evaluation, and performance analysis.

Retrieval-Augmented Generation — RAG

Developed a RAG-based system combining document retrieval and generative AI models to improve the relevance and accuracy of generated responses.

EDUCATION

license's Degree in Software Engineering and Information Systems

Sep 2023 – June 2026

University of Science Gabes, Tunisia

CERTIFICATIONS

- General AI Basics and NLP
- AI and Applications
- Apply AI: Analyze Customer Reviews — Cisco
- Career Essentials in Generative AI — Microsoft & LinkedIn

- AI Infrastructure and Operations Fundamentals — NVIDIA
- Google IT Automation with Python

LANGUAGES

Arabic: Native **English:** Advanced

French: Intermediate **German:** Elementary
