PROFESSIONAL SUMMARY

Software Engineer and Information Systems graduate with a strong foundation in full-stack web development and a growing specialization in Artificial Intelligence, Machine Learning, and Data Science. Experienced in building web applications, backend services, REST APIs, and data-driven solutions using modern development frameworks and tools. Strong analytical and problem-solving abilities, with an interest in developing scalable, intelligent, and maintainable software solutions.

TECHNICAL SKILLS

- **Programming:** Python, JavaScript, C, C++, C#, PHP, SQL
- **Web Development:** Flask, Django, FastAPI, REST APIs, HTML, CSS
- **AI & Machine Learning:** Scikit-learn, TensorFlow, PyTorch, Machine Learning, Deep Learning, Generative AI
- **Data & Databases:** PostgreSQL, SQL, Data Analysis, Data Processing
- **Tools & Platforms:** Git, GitHub, Linux, Docker
- **Software Engineering:** Object-Oriented Programming, API Development, Software Design, Problem Solving
- **Soft Skills:** Analytical Thinking, Communication, Teamwork, Organization, Adaptability, Continuous Learning

EXPERIENCE

AI Engineer Intern at Kifahi *January 2026 – May 2026*

BI Bot and Data Analysis : Gratuated Project

- Contributed to the development of a Business Intelligence chatbot for ERP data analysis and decision support.
- Worked on backend services, data processing, analytics, and AI-powered features.
- Applied software engineering and machine learning concepts to real-world business data.

Script Writer with Hack Club *May 2025 – December 2025*

- Developed and maintained Python scripts for technical and community-oriented projects.
- Used Git and GitHub for version control and collaborative development.

Freelancer at Microworkers *September 2023 – December 2023*

- Automated email account creation and routine tasks using Python scripts and automation tools.
- Worked with B2B clients, following project requirements and delivering reliable technical services.
- Provided IT-related services including data processing, online research, account management, and technical support.
- Developed practical skills in automation, client communication, troubleshooting, and task management.

PROJECTS

BI-Bot AI-Powered Business Intelligence Platform

Developed an AI-powered BI platform that converts natural language questions into validated SQL queries and business insights. Built with FastAPI, Angular, ClickHouse, LlamaIndex, Qdrant, LLMs, and machine learning models including XGBoost, LightGBM, and PyTorch. Implemented analytics, diagnostics, forecasting, comparative analysis, product lookup, and data visualization.

7JUNEAI Chatbot Developed a full-stack chatbot web application using Flask and React. Implemented RESTful APIs, integrated language-model capabilities, and managed the application environment and backend services.

AI & Data Science

Developed AI and Data Science projects covering web scraping and data collection with Scrapy, data preprocessing, feature engineering, clustering, classification, machine learning and deep learning model training and evaluation, as well as Retrieval-Augmented Generation (RAG) systems for document retrieval and generative AI.

Web Application Development

Developed full-stack web applications using Laravel, React.js, FastAPI, Django, and REST APIs, with experience in authentication, responsive interfaces, data visualization, document processing, and AI-powered features. Technologies include PHP, Python, JavaScript, Vite, Bootstrap, Django REST Framework, and Docker.

EDUCATION

Licence's Degree in Software Engineering and Information Systems *Sep 2023 – June 2026*

University of Science Gabes, Tunisia

CERTIFICATIONS

- General AI Basics and NLP
- AI and Applications
- Apply AI: Analyze Customer Reviews with Cisco
- Career Essentials in Generative AI with Microsoft & LinkedIn
- AI Infrastructure and Operations Fundamentals with NVIDIA
- Google IT Automation with Python

LANGUAGES

English: Advanced **French:** Intermediate **Arabic:** Native
